

We Provide High Availability Sintered Stone for Less

What is Sintered Stone?

A high-end, premium porcelain that combines natural elements with cutting-edge engineering for unparalleled performance and beauty.

It is made by compressing natural minerals under high pressure, then heating them at extremely high temperatures to fuse the particles together.

With exceptional durability and resistance to the effects of the environment, sintered stone is the ideal choice for interior or exterior surfaces that demand longevity with more than a touch of class.

The essence of sintered stone: "Nature crafted by Man"

Benifits

Scratch & Impact Resistant

Hygienic

UV Resistant

Waterproof

Easy to Clean

Resistant to Ice & Frost

Resistant to Heat
